

Grinder Models T/S/B/TQ

The models T,S and B grinders have polished stainless steel cases and are ideally suited to the Fracino range of coffee machines. The models T,B and Tranquilo grinders are operated manually by an on/off switch. The model S grinder automatically turns off when the dispenser has filled with ground coffee. All grinders have adjustable grinding blades and coffee portion control. Coffee is dispensed into the filter holders by means of a flick lever mechanism. The Tranquilo grinder is also available in a chrome option and as a single shot grinder for the freshest coffee. A tamper would be required for this option.

Height (mm)	Width (mm)	Depth (mm)	Hopper Capacity	Dispenser Capacity	Motor HP/RPM	Weight
610	210	310	1kg	600g	0.1/1300	8kg

Optional Extras

1. Rapido Super Frother

No fuss, no waste, the Rapido creates the perfect frothy cappuccino coffee by sucking, heating and foaming the milk straight from the container into the cup.

2. Knock Out Drawers

Under grinder and under counter knockout drawers are available to complement this range of coffee machines and grinders.

Key Features

- Classic and contemporary designs to suit all venues.
- Hand fill professional/semi-professional, one group machine for the home, office and low volume outlet, serving approximately 50 (Heavenly and Cherub) to 70 (Little Gem) coffees daily.
- Unique – can make two drinks and steam milk simultaneously.
- Full size, thermosyphonic, brass bodied coffee making group ensuring consistent temperature and smooth extraction.
- Pressure gauge and electronic water control.
- Top quality copper boiler heated by a multiple looped element.
- Can be adapted for use with coffee pod systems.
- No installation requirements other than a 13 amp socket.
- Automatic water level system with probe, electronic control unit and solenoid valve.
- Low level warning light on the front panel of the Little Gem indicates when the tank needs filling. Audible warning on Cherub and Heavenly.
- Power shut off feature to protect the element should the boiler water level drop.
- The pressure of water and steam is separately controlled by brass safety valves.
- Brass bodied group with stainless steel shower plate, solenoid valve and high pressure pump.
- Stainless steel steam tube.
- Pressure controlled by a double contact pressure switch.
- Cherub available with polished stainless steel sides as an optional extra.

fracino

Perfect Partners for small venues

Fracino, creator of the world's most powerful coffee machines presents the Little Gem, Heavenly and Cherub ranges. These contemporary, compact, hand fill machines are particularly relevant in venues where space is a problem or plumbed water is not available. Dynamic and sleek, they are the latest low volume professional/semi-professional coffee machines that are reliable, durable and user friendly.

Suitable for pods or ground coffee the stylish machines are ideal for those requiring between 50 and 70 coffees daily – revolutionising the espresso experience in offices, hairdressing salons, boutiques, pubs, bars and the home.

With the facility to make two drinks and steam milk simultaneously these unique machines feature a high-powered element and a full sized commercial group ensuring production of the finest coffee.

Complementing today's vibrant bar and café culture, the range is perfect for outside caterers or larger venues seeking the flexibility of a portable espresso machine for great coffee 'on the go'.

Contemporary and classical styling to suite all venues. Perfect coffee machines for latte, cappuccino and espresso based drinks. Hot water outlet is standard on all models to enable tea or hot chocolate to be made with water.
